Dear FCC,

Why is it that when a company, such as XM Satellite Radio, comes up with a great service to the public someone feels inclined to destroy it? I love my XM Satellite radio. Their programming is top quality listening. The weather and traffic stations are great assets to the members of XM Satellite Radio.

Not only as a concerned XM Satellite Radio listener, but as a citizen of this great country I respectfully urge you to reject this petition. This country is about freedom and not dictatorship.

Please don't allow the National Association of Broadcasters to dictate what I have a right to listen to!

Respectively Yours,
Todd E. Becker
